

## CREATING TEXT TO SPEECH SERVICE

The screenshot shows the IBM Cloud catalog page for the Text to Speech service. The page is titled "Text to Speech" and describes it as a service that "Synthesizes natural-sounding speech from text." The "Create" tab is selected, and the user is prompted to "Select a location" and "Select a pricing plan." The location is set to "Sydney (au-syd)" and the pricing plan is "Lite" (10,000 Characters per Month, Free). A summary panel on the right shows the service details, including the location, plan, and service name. A "Create" button is visible at the bottom of the summary panel.

Getting started with Text to Speech

Last Updated: 2021-02-02

The IBM Watson™ Text to Speech service converts written text to natural-sounding speech to provide speech-synthesis capabilities for applications. This `curl`-based tutorial can help you get started quickly with the service. The examples show you how to call the service's `POST` and `GET /v1/synthesize` methods to request an audio stream.

IBM Cloud® only. Watch the following video for a visual summary of getting started with the Text to Speech service.

Getting started with Text to Speech
